ARTWORK SPECIFICATIONS

ADDITIONAL FEES

Color change – \$20
PMS match – \$30
Revision fee – \$10

SIZING

PLEASE SEND YOUR ARTWORK AT THE SIZE YOU WOULD LIKE IT PRINTED. If this is not possible, you must indicate the exact size you would like your artwork changed to. Please note: enlarging a low resolution raster file can result in poor image quality.

Files will be evaluated to determine if they are print ready and may require additional art time and charges to correct issues, which may also delay your order.

LINE WEIGHTS

Minimum thickness for all lines is 1 pt (or .014"). Any lines smaller than this may not print. All negative spaces (where shirt shows through) need to be a minimum thickness equivalent to 2 pts (or .028"). Any spaces smaller than this may fill in. Line weights need to be thicker for Metallic, Foil, and Neon designs. If your design requires backing, line weights need to be a minimum of 4pts in order to back it with another color and/or require an outline around the design.

ACCEPTABLE FILE FORMATS

Vector Files: Adobe® Illustrator®, CorelDRAW®, .eps, .pdf
Raster Files: .tif, .jpg, .psd, .png, .pdf, .gif, .bmp.
Other Files: .doc, .txt, .ppt
Generally these file formats are not usable, but can be used as a template to create artwork.

A resolution of 300ppi @ 100% size is preferred.

COLORS

Please use spot colors when creating your artwork. If your design has white in it, clearly denote this in another color or show the design on a colored background. Please use consistent colors in your files. For example, use one red to represent all of the red areas in your design. Some colors (neons, yellow, etc.) may require a white backing color to make them opaque on dark shirts and are subject to additional charges. If your design requires backing, line weights need to be a minimum of 4pts in order to back it with another color and/or require an outline around the design.

FONTS

For vector artwork, please convert all fonts to outlines (Illustrator®) or curves (CorelDRAW®) before sending your file to us. For Photoshop® files, please rasterize/render all layers that are type. Once your text is converted, it can no longer be edited so you may want to save a copy to edit in the future.
